

THE HOUSEPROFESSOR

Hello Homeowner:

As a homeowner myself, I understand that there is a constant need to keep-up on house maintenance, worn/aging minor components and unexpected minor repairs. Occasionally, there is the need to take care of unexpected major repairs like leaking roofs/plumbing/windows/basements and break downs with your furnace/AC/sump pump/appliances. There is also the need to schedule for aged worn major component to be replaced *before* a breakdown occurs.

This is where The HOUSEPROFESSOR can assist you! We can make your "Honey Do" list for you and then *prioritize* it! We can perform a detailed inspection of your home and then prioritize the discovered repair/replacement/maintenance measures. Are you aware that 1 in 5 homes have

a major defect and generally the Homeowner is unaware of this defect!

We can also protect your family from environmental concerns like: radon, mold, lead paint, carbon monoxide, EMF forces and air & water toxins.

If water intrusion is occurring, and it is unclear where the water entry location is, we can once again assist you. Using an Infrared Camera and our 30+ years of inspecting over 15,000 properties gives us the knowledge and confidence that we will find your leak source.

If you have a specific concern with your home, I would like very much if you would phone call or email me to discuss the concern. This is a free service I offer to all publication recipients.
