

HOUSEPROFESSOR Services Offered to Insurance Companies

- When insurance company clients have a claim due to water intrusion caused by roof leaks, window leaks, basement leaks, plumbing leaks, condensation development. Many times it is unclear where or what is the source of the moisture.
- The HOUSEPROFESSOR is a veteran in Forensic Diagnostics and will find the source of the moisture intrusion. We use Thermography per an Infrared Camera, Moisture Meters and intricate flood testing to find the exact water source(s).

In addition, to these useful tools, it is our experience of performing over 16,000 inspections that provide us the knowledge to successfully determine the source of the moisture intrusion. We also “Write the Specifications” for the solution to the discovered moisture problem. With these Specifications, your client can easily provide them to perhaps 2-3 known contractors and feel confident each contractor is bidding on the same solution specifications.

- Insurance Company clients may also have claims, or simply are looking to their insurance company for guidance, on environmental issues that we specialize in as well. These environmental issues include: Asbestos, Urea Formaldehyde Gas, Radon, Carbon Monoxide, Lead Paint, Mold, Soil Testing, Water Testing, Septic/Well Inspections, Electro Magnetic Fields, Air Infiltration diagnostics via a, “Blower Door”, Energy Audits and Home & Commercial Inspections at time of Sale or during occupancy.
